Project Idea:

Single platform jo Linkein, indeed, Glassdoor, unstop aur Adzuna jaise portals se real-time job aur internships ek jagah aggregate karke dikhaye.

Core features (Must):

→ Public Search Bar: Job title, company, ya skills se global search
→ Multi-Source Aggregation: Multiple platforms se listings fetch karna.
→ Advanced Multi-filters:
- Job type (Full time / internship)
- work Mode (Remote / Hybrid / Offline)
- Salary / Stipend
- Source filter

→ One click apply redirection: Original job post link par direct switch.
→ User Accounts:
Bookmarks / Saved Jobs aur Job alerts.

frontend !

→ HTML5
→ CSS 3
→ JavaScript

Backend !

→ Node.js and Express
→ JSearch API (rapid API) / Adzuna API / JoobleAPI
→ Custom Scrappers :
Puppeteer / Playwright
for hiring portals without API
→ Automation ! node-cron
(Hourly / daily
background data sync)

Database and caching

→ MongoDB Atlas ! Job schema, user profiles and bookmarks
→ Redis (future) : API response caching for super-fast performance
